

MindManager®

MindManager or MindManager Enterprise: Which one is right for you?

When a few individuals in an organization are able to capture, organize and share critical information more effectively, it can transform a process, a project, even a department. When whole teams are doing those things together, it can transform an entire business.

MindManager Enterprise empowers teams of 5+ with all the benefits of the single-user MindManager software, plus a uniquely powerful set of tools specifically designed to foster alignment, increase productivity and drive projects forward. It also offers procurement and IT departments a streamlined, supported, cost-effective way to equip both MindManager users and the entire organization for efficiency and success.

Fair & Flexible Pricing

The MindManager Enterprise License Program includes mandatory Mindjet Software Assurance and Support (MSA), ensuring you an experience that is customized to your current requirements and budget, and can easily adapt to your organization's changing needs.

	MindManager Single License (Windows & Mac)	MindManager Enterprise License Program with MSA
Volume & band pricing Leverage your current single licenses to upgrade; add additional licenses and save	—	✓
